

DEDICATED
Solutions

Passion for Excellence

Dedicate Solutions is one stop solution provider to design and manufacturing industries serving in middle east countries, we help to leverage design development and bring value to the process by using advanced engineering CAD/CAM/CAE tools to improve & innovative product while reducing time & costs and delivering certainty, while our priorities had always been to deliver the best to achieve customer satisfaction.

Our Mission

To help our business partners realize great success with new technologies and services.

Our mission is to develop and maintain loyal clients by providing world-class engineering and technical services, which include designing, manufacturing, and supporting client communication and electronic system solutions.

Market & Countries

Valued Solutions

3D Technology

helps companies to produce improved & innovative products with reduced time & costs associated with design while helping to test the manufactured products in earlier stages of design to verify its functionality & stability in the real world with advanced engineering tools offered by renown global leaders.

Aluminum Building Kit Automation

item

item is a successful, medium-sized group of companies that has dedicated itself to the development and global distribution of high-grade components for the construction of production equipment, machines and other installations.

3D Technology

DEDICATED
Solutions

Engineering Solutions (SolidWorks)

Solutions that enable you and your team to quickly transform new ideas into great products. Its intuitive interface and powerful design capabilities drive smarter, faster product development that powers your company's success. Easy-to-use yet powerful toolsets, clear communication of design information, virtual prototyping, and quick generation of manufacturing-ready drawings and data give you the distinct advantage in a competitive market.

3D CAD
SolidWorks 3D CAD solutions enable you and your team to quickly transform new ideas into great products.

SIMULATION
Subject your designs to real-world conditions to raise the quality of your products while you reduce your costs for live prototypes and testing.

TECHNICAL COMMUNICATION
Effectively communicate complex product details by leveraging existing 3D CAD data across your organization to create polished content and animations.

Easily find and repurpose files, parts, and drawings; share design information; automate workflows and ensure manufacturing always has the right version.

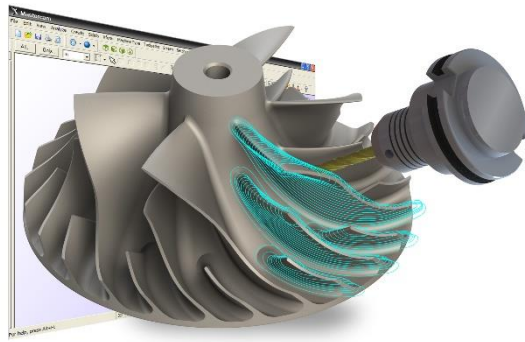

Combine the electrical schematic functionality of SolidWorks Electrical Schematic with the 3D modeling capabilities of SolidWorks Electrical

SolidWorks educational products are utilized at over 80% of the world's top engineering schools

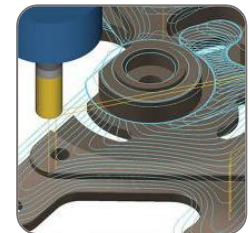

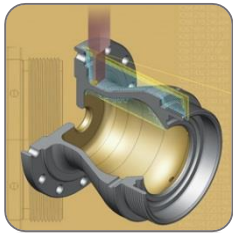

Engineering Solutions (CAM Software)

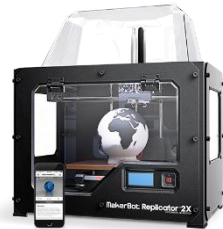

Mastercam

Mastercam is the most widely used CAM software worldwide and remains the program of choice among CNC programmers. Mastercam Mill is delivering the most comprehensive milling package with powerful new toolpaths and techniques. Big and small companies in every industry trust Mastercam, the most widely used CAD/CAM software in the world. As pioneers in CAD/CAM for nearly two decades, CNC Software.

Engineering Solutions (3D Printers)

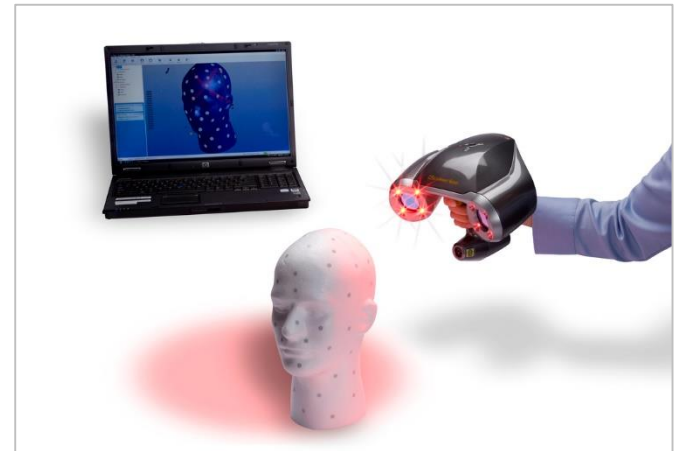

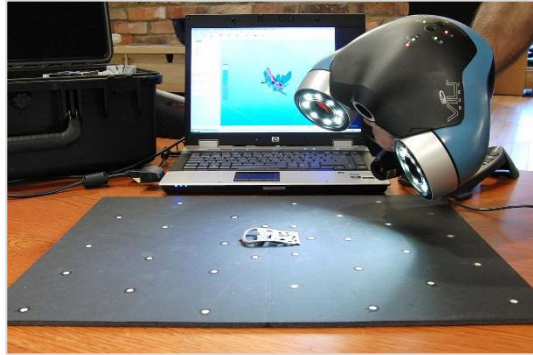

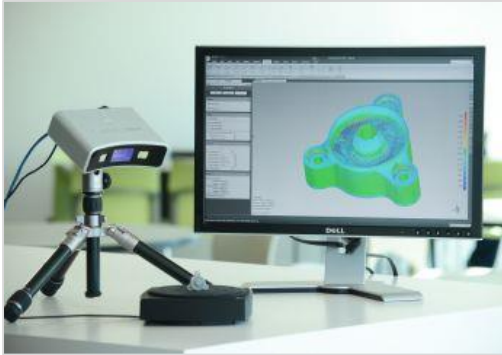

3D printing is a various processes to make a three-dimensional object. In 3D printing, additive processes are used, in which successive layers of material are laid down under computer control. These objects can be of almost any shape or geometry, and are produced from a 3D model.

MakerBot Printers Designed for professional use, 3D printer can create directly from your CAD software, models of flawless work, composed of elements such as durable ABS plastic that can be sanded, milled, and even painted.

Engineering Solutions (3D Scanners)

A **3D scanner** is a device that analyses a real-world object or environment to collect data on its shape and possibly its appearance. The collected data can then be used to construct digital three-dimensional models.

Engineering Solutions (IT Solutions)

The UK's Only 100% Dedicated Computer Workstation Manufacturer

Workstation Specialists design and custom build high performance computer workstation solutions for Computer Aided Design / Manufacturer / Engineering (CAD, CAM & CAE), Digital Content Creation (DCC), Visual Effects (VFX), Animation, Broadcast, Game Development and Post Production Professionals.

Your distribution partner for data storage, servers & end-to-end IT solutions

Adding value since 1991, storage software and server solutions, cloud infrastructure and services, integration and professional services, digital data components, latest technologies leading vendors ... and more.

3Dconnexion

Imagine being able to go inside your screen to enter your 3D model...

Redefine the way you work with 3D applications. Pan, zoom and rotate as if you're holding the model in your hand. The programmable keys can conserve functions and shortcuts to access applications faster. Push, pull, twist or tilt the cap a fraction of inch to simultaneously pan, zoom and rotate 3D imagery.

Aluminum (Building Kit Automation)

item

item is a successful, medium-sized group of companies that has dedicated itself to the development and global distribution of high-grade components for the construction of production equipment, machines and other installations.

Beside the components we offer our customers design services, profile processing, assembly kits and also a fully integrated solution.

MB Building Kit Systems

The item MB Building Kit System is the solution for all design and construction tasks.

Work Bench System

Optimum work bench design for manual work benches in industrial and office environments

Line D30

The Line D30, the lean production system from item - exceptionally versatile, stable and efficient.

Aluminum (Building Kit Automation)

Mechanical and factory equipment

Thanks to more than 150 profile variants and specialized fasteners to suit every need, the MB Building Kit System offers unlimited combination options.

Enclosure and guard systems

The system with safety built in. item provides all the components required to build enclosure and guard systems of the highest technical standard. The results are safety solutions.

Work Bench Systems

Whether ergonomic standalone work benches, interlinked assembly lines or partially automated production lines – item supplies the components required to create efficient and fatigue-free working practices.

Aluminum (Building Kit Automation)

Lean Production

Solutions from item deliver the freedom and flexibility that cost-effective manual assembly systems require. Easy to assemble, easy to convert – self-explanatory functional elements can be configured and reconfigured rapidly.

Linear technology

The efficient linear systems from item enable users to develop automatic solutions of the highest standards. The highly accurate linear slides can be used to connect numerous axes into complete handling and positioning systems.

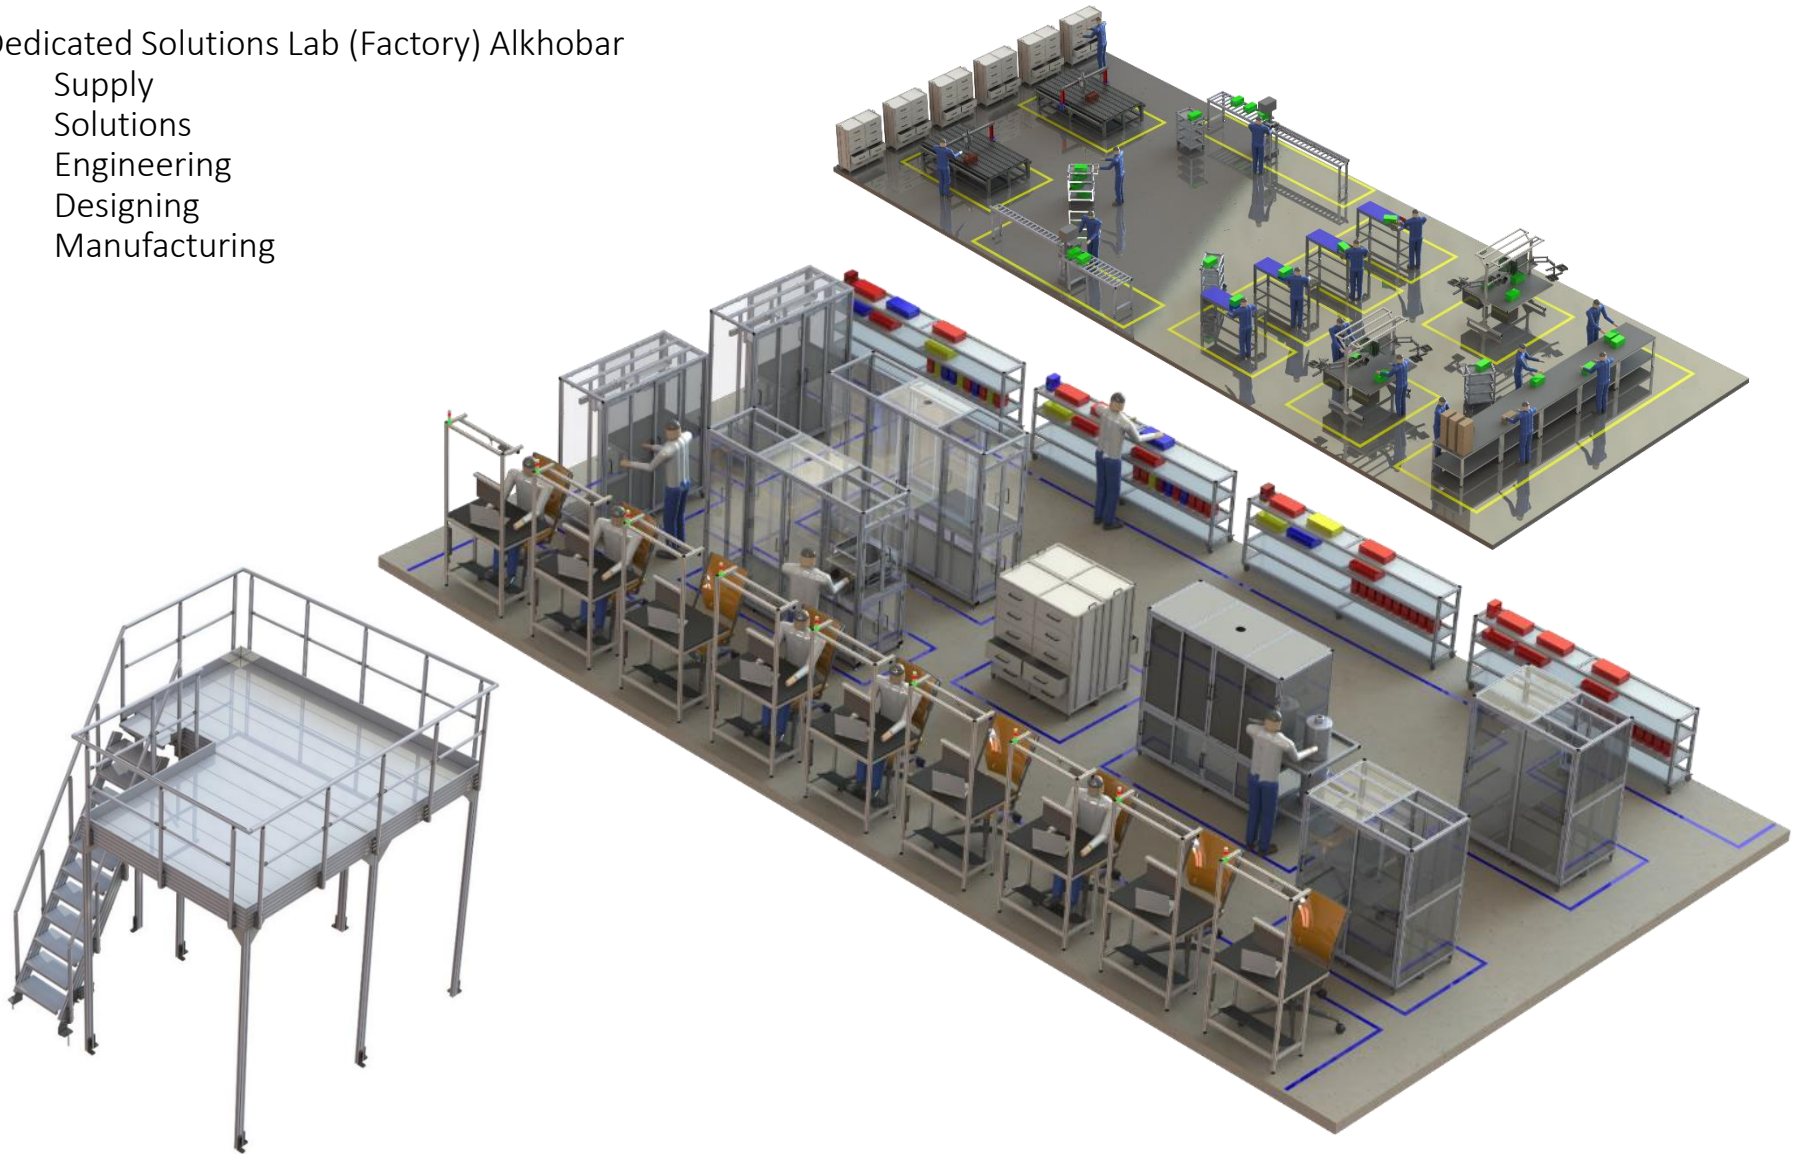

Stairway/Platform System

Whether one large platform, an all-round assembly platform or a simple maintenance platform, the Stairway/Platform System can be used to build working areas at any height.
